

Agricultural Machinery Parts

Description

We have our own casting foundry and machining factory , our products are mainly used in various industries. We can provide many kinds of casting parts, stamping parts, machining parts and forging parts.

Features

Advantages of Casting Process:

- 1: Suitable for complicated structures.
- 2: Customized, made to customer's drawing or prototype.
- 3: Casting provides Precise shape, less material machining.
- 4: Wide weight variation allowed, from 1kg to 40kgs.
- 5: Wide range of material spec can be selected: GG450, GG500, GG700, ASTM 65-45-12, SIMO Iron, Stainless steel.
- 6: Parts can be used for different industries, Auto Exhaust Pipe, Hydraulic industry parts, Agricultural Machinery Parts.
- 7: High temperature resistant.
- 8: Main application: Metallurgy, Machinery, Plastics, Rubber, Pharmaceutical, Textiles, Mining, Paper-making, Packaging.
- 9: Main equipments: Furnaces, Heat treatment furnaces, Direct-reading spectrometer; Shot -blasting equipments, etc.
- 10: Surface treatment: Polishing, plating, shot blasting, heat treatment, etc

Why Choose SAIVS™ as Your Supplier?

1. Superb Quality Control Management

At SAIVS, we take pride in our perfect quality management systems and procedures, which guarantees the excellent performance of all our products, being a professional Investment Casting | Die Casting| Sand Casting manufacturer in China.

2. Rich Production Experience

With 20 years of experience in production, SAIVS has a deep understanding of the market and trends, and strives for continuous research and innovation. This has created advantages in both the product's performance and appearance.

3. Competitive Prices

As a Chinese factory committed to becoming the most cost-effective Investment Casting | Die Casting| Sand Casting exporter in China, SAIVS provides high-quality products at advantageous prices. By lowering costs and increasing efficiency, we ensure that our customers receive the best possible value for their investment.
