

Mining Machine Parts

Description

We have 630T-2500T forging equipment, products from 0.5KG-40KG production capacity, We have abundant experience of import and export, and can offer our clients good quality products with very competitive price and fast delivery. we can do according to your requirement.

Our strong R&D and QC department can control the products to meet your strict requirement. 100% according to your drawings and your samples.

We offer the engineer consultation to your design for production improvement and cost saving. We can provide packing according to your specific requirements.

Features

Mining Machine Parts are mainly used in the Mining Machinery, construction machinery and so on.

Material: alloy steel 1020, 1045, 4140, 8620, etc.

According to the customer's requirements for production and processing, all the production of parts materials, size, surface treatment and other technical specifications must meet the customer's design of the drawing requirements.

The accuracy of forging products is guaranteed to CT6-7, and the dimensional accuracy after precision machining can be guaranteed to IT5-IT7.

Surface treatment: Powder coating, Polishing, Sand plating, Acid pickling, Painting, Machining, Anodizing, sand blasting, zinc plated, etc.

CNC and MC machining: Three coordinate measurement machine for testing.

Why Choose SAIVS™ as Your Supplier?

1. Superb Quality Control Management

At SAIVS, we take pride in our perfect quality management systems and procedures, which guarantees the excellent performance of all our products, being a professional Investment Casting | Die Casting| Sand Casting manufacturer in China.

2. Rich Production Experience

With 20 years of experience in production, SAIVS has a deep understanding of the market and trends, and strives for continuous research and innovation. This has created advantages in both the product's performance and appearance.

3. Competitive Prices

As a Chinese factory committed to becoming the most cost-effective Investment Casting | Die Casting| Sand Casting exporter in China, SAIVS provides high-quality products at advantageous prices. By lowering costs and increasing efficiency, we ensure that our customers receive the best possible value for their investment.
